DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to an apparatus, which reads a code given to a commodity to obtain setting information, classified in class 235, subclass 435.
 - II. Claims 8-10 and 12, drawn to an apparatus and method which reads a code using at least one beam to obtaining a frequent beam for setting information, classified in class 235, subclass 454.
 - III. Claims 11 and 13-15, drawn to a method for setting an operation based on the operator's information, classified in class 235, subclass 376.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as reading a code data (i.e., a magnetically or electrically encoded data) to obtain a setting information of an operation. See MPEP § 806.05(d).
3. Inventions Group I and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group III has separate utility such as manually entering the setting data for an operation based on the operator's information without reading a code given to a commodity. See MPEP § 806.05(d).
4. Inventions Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention Group II has separate utility such as reading a code using an optical application (i.e., at least one beam of the plurality of beams) to obtaining a frequent beam for setting information. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. James Halsey, Jr. on 28 May 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. I. Lee whose telephone number is 703-306-3427. The examiner can normally be reached on Monday through Thursday from 5:30 AM to 4:00 PM.
